

Item No. 9 of the U. S. B. R. covers the proposed Ultimate Phase of the Central Utah Project and includes uses of water from the Green River for replacement of waters exported from the Uintah Basin to the Bonneville Basin.

Item No. 10, an application submitted by the Monarch Canal and Reservoir Company, seeks a right to enlarge an existing small reservoir and to construct a new reservoir on high mountain lakes within the Dry Gulch Creek Drainage.

After giving careful consideration to each of these filings, it is the finding of the State Engineer that general public interest can best be served by filing the above-listed applications in the following order with the priorities as listed:

App.No.	Applicant	Quantity	Source	Priority Assigned
36637	Central Utah Water Cons. Dist.	6.55 cfs	Duchesne River	11:00 A.M. Nov. 19, 1964
36638	U. S. Bureau of Reclamation	200,000 AF	Duchesne & Strawberry Rivers (Starvation Res.)	12:00 Noon Nov. 19, 1964
36639	U. S. Bureau of Reclamation	500,000 AF	(Bonneville Unit)	12:00 Noon Nov. 19, 1964
36640	Dry Gulch Irrigation Co.	250 AF	Lake Atwood	10:30 A.M. Nov. 27, 1964
36641	Dry Gulch Irrigation Co.	400 AF	Fox Lake	10:30 A.M. Nov. 27, 1964
36642	U. S. Bureau of Reclamation	100,000 AF	(Upalco Unit)	11:00 A.M. Nov. 27, 1964
36643	Monarch Canal & Res. Co.	500 AF	Dry Gulch Creek	8:00 A.M. Dec. 4, 1964
36644	U. S. Bureau of Reclamation	100,000 AF	(Uintah Unit)	9:00 A.M. Dec. 4, 1964
36645	U. S. Bureau of Reclamation	1,400,000 AF	(Ultimate Phase)	10:00 A.M. Dec. 4, 1964
36646	Uintah Power and Light Co.	96.62 cfs	Uintah River	11:00 A.M. Dec. 4, 1964
